Professional Roulette System™

CONGRATULATIONS!

You have now reached the end of your search for the “PERFECT ROULETTE SYSTEM!” This is it! You will be insanely successful with this system!

Ok, now that we have that out of the way, let's get down to my winning roulette system and what makes it work Perfectly Every Time!

Whether or not you're a seasoned roulette player, or just a beginner, you will completely understand my winning system by the time you finish this manual.

You now hold in your hands the guide to Complete Financial Freedom! Use your new found information wisely and follow every step of this guide exactly as outlined below. You Will Be Happy You Did!

Do Not Deviate in any way from the information given below, or you will lose all your money and your Entire Bankroll.

The game of roulette, over the years, has been a very desirable and preferred casino game.

Many roulette systems have been devised, but Very Few have ever been perfected into a Finely Tuned Money Machine, like this one!

ClickBank is a registered trademark of Keynetics Inc., a Delaware corporation. Disclaimer: As with any gambling system, it needs to be said there is no guarantee of winning or making money using my Professional Roulette System. All information described above is for entertainment purposes only and the user of this information is responsible for any losses that may occur applying it.

I have purchased about every roulette system out there and tried them all. Some of them are good but they all have one thing in common. They all lose in the long run. That is why I set out to create one of the best roulette systems in history.

And I have now done it!

I have been playing roulette for over 20 years now and I have tried and tested many different sequences, betting patterns, and staking plans.

For the last 2 years I have been testing and tweaking a certain unique betting pattern and very powerful staking plan, and have finally perfected it!

Below is a description of this powerful winning system and you will be successful using it in any online live web cam casino or land based casino.

This system is my own invention and you will not see another one exactly like it anywhere! Assuming you are already familiar with the game of roulette and the various bets made on the felt, I will explain my Winning Professional Roulette System in easy to understand step by step instructions.

Using my Professional Roulette System, you will be placing a bet every spin of the wheel, so there is no boring waiting in between spins for the right circumstance to arise in order to place your bet, like many other systems out there. Also, it is 100% mechanical so there is no luck or guesswork involved.

You will know exactly where and how much money to place on every spin of the wheel.

Lifetime Bankroll Needed

The lifetime bankroll needed to safely use my system without any risk is just 100 units. To calculate the total money value, just multiply 100 times the minimum table limit.

Example: Minimum table limit bet is \$5. Your lifetime bankroll needed is \$500. Minimum \$10 table limit bet would need a \$1000 lifetime bankroll. Using my system you can expect to make 10 units per hour.

This is not a get rich quick system, but you will make a slow and steady profit hour after hour. The longer you play, the more money you will make! See the bankroll and profit chart below:

Minimum Table Limit	Lifetime Bankroll	Average Profit Per Hour
\$5	\$500	\$50
\$10	\$1000	\$100
\$15	\$1500	\$150
\$20	\$2000	\$200
\$25	\$2500	\$250

If you are not too familiar with the game of roulette, the bet placements on the felt and payouts are listed on the chart below:

Professional Roulette System™

A	Straight up 35:1 - bet is placed on a single number
B	Split 17:1 - bet covers 2 numbers in a row
C	Street 11:1 - bet covers 3 numbers in a row
D	Corner 8:1 - bet covers 4 numbers
E	Basket 6:1 - bet covers 1, 2, 3 and both zeros
F	Line 5:1 - bet covers 6 numbers in two rows
G	Column 2:1 - bet covers 12 numbers
H	Dozen 2:1 - bet covers 12 numbers
I	Low number 1:1 - bet covers numbers between 1-18
J	High number 1:1 - bet covers numbers between 19-36
K	Red / Black 1:1 - bet covers red or black numbers
L	Odd / Even number 1:1 - bet covers odd or even numbers
M	Zero Split 17:1 - bet splits both zeros

		0 M 00		
1 to 18 EVEN	1st 12	E 1	2	3
		F 4	5	6
		7	B 8	9
RED	2nd 12	10	11	12
		13	14	15
		16	A 17	18
BLACK	3rd 12	19	20	21
		22	23	24
		25	26	D 27
ODD	19 to 36	C 28	29	30
		31	32	33
		34	35	36
		H 2:1	H 2:1	H 2:1

NOTE: You do not need to worry about memorizing all the bet placements above as the only ones you will be placing are the even money betting sections labeled, I, J, K, and L above that pay 1:1 ratio. This is the best bet on the roulette table with the best odds.

SYSTEM DETAILS

The reason we use the even money betting sections is that you will have the greatest advantage on the roulette table of winning 1 single bet placement (bet placed on 1 single section of the board) than any other single section of the roulette betting placement board.

On a European single 0 wheel you have a 48.65% chance of winning each even money bet. On an American double 00 wheel you have a 47.37% chance of winning each even money bet.

The beauty of my Professional Roulette System is you only need to win 35% of the time using my Powerful Staking Plan!

Combined with my Unique Betting Selection, you will achieve a win in Every Mini Session you play, giving you a whopping 100% win rate!

Ok, now that I have explained the basis of my system, let's get down to the nuts and bolts of my Professional Roulette System and what makes it work so well every time you use it!

As I explained you will be betting on all of the even money sections of the felt labeled I, J, K & L above on the outer edge of the roulette board.

These sections are labeled, facing the table from left to right, 1-18, Even, Red, Black, Odd, 19-36.

I will be referring to 1-18 as Top and 19-36 as Bottom for explanation purposes.

When you arrive at the roulette table you will need to first cash in for your chips.

Using a \$5 minimum table as the example, place \$500 on the roulette felt in front of you. Never try to hand your money directly to the dealer! He/she cannot legally take the money from your hand and will tell you to lay it on the table.

Ask the dealer (croupier) for 100 \$5 chips. He/she will most likely ask you if it is ok to give you one of the colored chip stacks.

That is fine as long as you see them use a \$5 marker for you. Sometimes when they switch dealers, the next dealer will think you are playing with \$1 chips, when they are really \$5 chips.

They will quickly correct it. I have never had a major issue with this, but they do get it mixed up sometimes.

Stack all your \$5 chips in 5 stacks of 20 each for easy tracking. You will be playing off of 1 stack at a time. Make sure you do not play off any of the other stacks until you need to. You need to always have 20 chips in each full stack so you do not get your bets mixed up. Covered later under Staking Plan section.

Session – vs. – Mini Session

For ease of understanding on how you will win long term profits from the casino using my Professional Roulette System, you will be playing multiple Mini Sessions that all make up a Session.

A Session is as long as you want it to be, but just make sure you complete a full Mini Session before you end your Session. Within each Session, you will play 1, or as many as you like, Mini Sessions depending on how long you would like to stay at the roulette table. I usually play for 1 to 2 hours at a time, then take a break for a while.

Each Mini Session will last anywhere from 1 to 20 spins or more and you will win 1 unit for each completed Mini Session. Most Mini Sessions only last 1 to 5 spins, but if you get into a losing streak, it could go longer.

If this sounds confusing to you now, it will make perfect sense to you after you have read the Staking Plan section below.

Betting Selection

For easy description and understanding I will be speaking in terms of units here.

Example: 1 unit = table minimum or starting bet. So assuming you are playing at a \$5 minimum table, which is very common 1 unit would equal \$5, 2 units would equal \$10 and 3 units would equal \$15, etc.

With my system we will divide all the even money bets into 3 categories:

Top/Bottom

Even/Odd

Red/Black

Using a \$5 minimum bet table, you will start by placing your first bet of 1 unit or a \$5 chip in either the Low or High section of the table.

The way you determine which section to place your bet in is that you **WILL ALWAYS** place it in the opposite section of the number that appeared last on the roulette display board showing the last 10 to 20 spin results so always pay close attention to which number appeared last on the board.

Example: The last number spun was 29. You will place 1 unit in the opposite, or low (1-18) section of the roulette felt. Next, number 34 was spun. You Lose!

NOTE: Weather you win or lose that bet or any bet for that matter, you **WILL ALWAYS** move onto placing your next bet in the next category to your right, moving inwards on the roulette felt toward the center of the categories on the board. So starting on the outer most category Top (1-18)/Bottom (19-36) and move inward, Even/Odd next, then Red/Black after that. Then you will move back outwards after that, and keep doing this inwards, outwards motion.

NOTE: Even/Odd category will be bet upon both on the inward and outward movement so this category will get the most action!

You will not skip around it when moving back outwards again.

Next bet will be placed on the opposite of the last Even or Odd to show on the display board. Staying with the example above, you will place a bet of 2 units or \$10 on the Odd section, which is opposite of the even number 34 that spun in last. Number 15 is spun next and YOU WIN! This completes your first Mini Session, and you are ready to start a new Mini Session.

IMPORTANT: Within each Mini Session, you are only trying to gain +1 unit. Nothing More!

From my explanation above, can you figure out which bet you would place next?

If you said 1 unit on Red, you are absolutely right! Number 23 is spun next and you win again! Another +1 unit was gained and you are ready to start your next Mini Session.

Now that you have played each of the 3 categories: Top/Bottom, Even/Odd, Red/Black, you will now start to move outward on the felt placing your bet in the Even/Odd category of the felt again. So using the last number spun 23, your next bet would be 1 unit or \$5 placed on the Even section of the board. Next spun is the number 7 and you lose.

The next category outwards is the Top/Bottom sections of the felt so you will place a bet of 2 units or \$10 on the Bottom (19-36) section, opposite of the last number 7 (Low) spun. Next number spun is 16 which is also in the low section of the last number spun, so you lose again. So now you are at -3 units and you move inwards again. Next bet is 3 units or \$15 on Odd and 3 comes in. A Win, putting you at 0, but the Mini Session is not finished until you win +1 unit. Next bet is 1 unit on Black and number 26 comes in for a +1 unit ending the Mini Session.

You will keep moving inwards and outwards, repeating these categories whether you win or lose on every spin of the wheel, as shown below:

Low/High

Even/Odd

Red/Black

Even/Odd

Low/High

Then repeat the pattern above over and over.

The easiest way to remember the betting selection is to start with the outer most category (Top/Bottom) and move inwards towards the middle (Even/Odd) next, (Red/Black) then back outwards (Even/Odd) and then (Top/Bottom), then back inwards again, over and over, etc.

REMEMBER: Win or Lose, you will always switch to the next category in line, but make sure you always keep track of which category you are betting in next, as this is very important to the success of my system. One wrong move could throw off the system and cost you your entire bankroll. Also, remember that within each category, you WILL ALWAYS place your bet on the **OPPOSITE** of the Number Just spun!

Staking Plan

This staking plan is not unheard of or never used before, but it is Very Powerful and Unstoppable when used with my Professional Roulette System! There are only a few good staking plans, but they need to be used with the right bet selection to create a Winning System! You now have a Money Making Machine In Your Hands!

As explained above you will start by placing 1 unit as your first bet. You will keep upping each losing bet with an additional 1 unit. So 1, 2, 3, 4, 5, 6 units and so on until you hit a win, then recalculate your tally and your bet.

VERY IMPORTANT: The most important part of using this staking plan is you need to recalculate your betting units each time so that you are either upping by 1 unit or lowering your bet to just make +1 unit each spin of the wheel and bet.

Example:

Bet #	Unit Bet	Win/Lose	Tally
1	1	Lose	-1
2	2	Lose	-3
3	3	Lose	-6
4	4	Lose	-10
5	5	Win	-5
6	6	Lose	-11
7	7	Win	-4
8	5	Win	+1

Notice in the example above that I lost 5 bets and only won 3, but still gained +1 unit. That is why this staking plan is one of the Most Powerful Money Management Plans in the gambling world. Also notice that on bet #8, after a win on bet #7, instead of raising my bet unit to 8, I lowered it down to a 5 unit bet so that I would only be gaining +1 unit upon a win on that bet. This is

Very Important to your Long Term Survival using my system.

Another Example:

Bet #	Unit Bet	Win/Lose	Tally
1	1	Lose	-1
2	2	Lose	-3
3	3	Win	0
4	1	Lose	-1
5	2	Win	+1

Notice in the example above on bet #3, I was back to even at 0, but my Mini Session is not completed until I have gained +1 unit so on bet #4, I placed a bet of 1 unit again so that I will gain just 1 unit upon a win. Then I lost that bet, but quickly recovered with a win on my next bet for a gain of +1 unit. Lost 3 bets, won 2 bets, and still profited. That is the beauty of this staking plan and why I chose it for my Unique Bet Selection!

NOTE: Whenever you drop down your bet, you will start up the latter again, adding just 1 unit to each bet going forward until you need to re-adjust your bet again, so that you are only gaining +1 unit upon a win. If you stand to win more than +1 unit, then you are betting too

much, and your bets will soon spiral out of control, depleting your entire bankroll to Zero!

Losing Streak Example:

Bet #	Unit Bet	Win/Lose	Tally
1	1	Lose	-1
2	2	Lose	-3
3	3	Lose	-6
4	4	Lose	-10
5	5	Lose	-15
6	6	Lose	-21
7	7	Lose	-28
8	8	Win	-20
9	9	Lose	-29
10	10	Lose	-39
11	11	Win	-28
12	12	Win	-16
13	13	Lose	-29
14	14	Win	-15
15	15	Lose	-30
16	16	Lose	-46

17	17	Win	-29
18	18	Win	-11
19	12	Lose	-23
20	13	Win	-10
21	11	Lose	-21
22	12	Lose	-33
23	13	Win	-20
24	14	Lose	-34
25	15	Win	-19
26	16	Lose	-35
27	17	Win	-18
28	18	Win	0
29	1	Win	+1

In the above example I had 17 losses and only 12 wins but still came ahead with a +1 unit. With this staking plan, you only need to win 35% of your bets to profit, and remember your chances of winning are 48.65% or 47.37% for the European single 0 or American double 00 wheel, giving you a Huge Advantage over the casinos using my winning system. Especially with my Unique betting selection that gives you wins close together.

Also the above example is an extreme scenario and does not happen too often, but notice the maximum I was down was -46 units out of my 100 unit bankroll at one time on bet number 16 and then on bet

number 19, after a win, I had to drop down to a 12 unit bet so that I would only make a +1 unit profit upon a win.

That kept me in the game long enough to win my Mini Session. Also had to drop down on bet #s 21 and 29 so that I only stand to make + 1 unit profit.

Always re-calculate your bet amount after a win so that you are always betting the proper amount on each bet to only gain 1 unit profit each time. This is very important to your long term survival and profitability using my Professional Roulette System!

An easy way to re calculate your chips without pen and paper is to make 5 stacks of 20 chips each. Then after each spin of the wheel, take all your chips off the felt and re stack them so that you can see how many chips you need to make your full 5 stacks of 20.

Using this Powerful Staking Plan, along with my Unique Betting Selection, you will Profit Very Nicely Every Time! Also, unlike most other roulette systems, there is no limit to how long you can play. The More You Play, The More You Win!

Dealing With The 0 and 00

When playing and using my Professional Roulette System you will occasionally encounter the 0 and 00, as with any system, but that is not a problem. In such case, you will lose your bet and just continue on, moving to the next betting category, and increasing your bet by 1 unit as usual. Never bet the same category two times in a row. Always continue on to the next betting category and stake, as if you had just normally lost a bet.

This way you will keep things jumbled up, giving you the same advantage of winning the next bet, as the last one! Also, you will just use the last 2 whole numbers spun to place your next bet, ignoring the 0 or 00.

Sample Tacking Sheet

Below is a sample tracking sheet and then a blank tracking sheet on the page to follow so that you can practice and get used to the bet selection and staking plan.

After that you will not need a tracking sheet although it is perfectly ok to use pen and tracking sheet at the roulette table in the casino if you feel more comfortable that way.

#Spun	Sect. Bet	Bet, W/L	Tally		#Spun	Sect. Bet	Bet, W/L	Tally
35	Bot.	1/W	+1		9	Red	1/W	+1
3	Even	1/L	-1		00	Even	1/L	-1
14	Black	2/L	-3		25	Bot.	2/W	+1
22	Odd	3/L	-6		31	Even	1/L	-1
17	Top	4/W	-2		13	Red	2/W	-3
12	Even	3/W	+1		5	Even	3/L	-6
8	Black	1/W	+1		12	Top	4/W	-2
36	Odd	1/L	-1		2	Odd	3/L	-5
19	Top	2/L	-3		23	Red	4/W	-1
22	Even	3/W	0		28	Even	2/W	+1

Explanation:

You will first write in the Section Bet, starting with Top/Bottom in the Sect. Bet column, going by the last number spun on the display board.

Next you will write in the number spun in the #spun column. Then 1 for your first bet of 1 unit, followed by a W or L for Win/Lose and last the Tally as it pertains, until you get to +1. Then start over.

Below is a blank tracking sheet you can take to the casino or use until you get comfortable with the betting selections and amounts.

Useful Tips to Keep From Getting Banned

Here are a few useful tips to keep from gaining too much attention and getting banned (kicked out for good) in any casino:

1. (Optional, but not Super Important) If it is possible, do not take a pen and paper to the table to write things down. Although they allow it, the eyes in the sky and pit bosses will try to see what you are doing to win. This way you can keep going back to your favorite casinos without raising too much suspicion.
2. Do not play at any roulette table for more than approximately 2 hours at a time. Keep moving around. Take a break and come back later. This way the eyes in the sky and pit bosses think that you have lost some money, and you are moving onto something else.
3. Don't get TOO EXCITED about your wins, throwing your arms up in the air and causing a lot of attention at the table. Be very humble and quiet. Not that you can't talk to anyone, but just don't cause a Big Scene at the table. Some people can't help but do this when they are excited. Be Humble!
4. If there is more than 1 casino in the area, rotate around to all of them. Just because you are winning at 1, don't keep going back to the same one every time. Go to a different casino each day, or week, or month, depending on how much you visit the casinos. Try to even your visits out to each casino so the same casino does not see you every day. You WILL WIN at All OF THEM!
5. This is one of the most important rules. TIP YOUR DEALER! Every so often, especially on a nice win, be sure to throw a few chips over to the dealer. This keeps them on your good side and also keeps them throwing positive energy your way. Also they will be less likely to ban you from the casino if all the dealers like you because you help with their paycheck! IT WORKS! And keeps good Karma flowing your way!

Online Live Web Cam Roulette

You can practice my Professional Roulette System for free online at www.dublinbet.com on a live web cam European single 0 roulette wheel and at www.betphoenix.com on a live web cam American double 00 roulette wheel. You will need to sign up for a free account first, and then they will give you \$1000 play money to practice with.

USA players are not allowed to fund their account with real money at dublinbet.com, but players in some other countries can fund their account with real money. USA players can fund their account with real money at betphoenix.com and they give a 100% cash bonus for casino games if you call them directly. Another live web cam casino offering roulette is www.ladbrokes.com I have not played there but I have heard they have a good reputation for paying their players.

I Highly Recommend you practice my Professional Roulette System quite a bit first before you play with Real Money so that you will gain confidence in the system and see just How Well It Really Works! This is a **VERY IMPORTANT STEP!** It is not good to play on what's called "Scared Money!"

This concludes my Professional Roulette System, and now every time you visit an online live web cam casino or land based casino, you will know:

You Are Going To Win!!!

Thank You! Sincerely,

James Klein
